

## **1. INTRODUCTION**

The model of foreign investments - privatization is accepted through the privatization laws. This method enables primarily the use of certificates as a way of payment, purchase of the assets, stake or total state capital of the enterprise. Each citizen was given certificates which were initial position for his realization of the private ownership share in the private property.

This model of the mass – privatization is used to change the existing state ownership structure, gives the possibility to all adult citizens that through various claims become owners of the capital, which so far was social/state ownership.

As far as the privatization procedure method and issuing of the claims are concerned, the method of the Public Offering of Shares (POS) was prior to all other methods. Tender as the method of the large - scale privatization is to be used only and exceptionally for the sale of enterprises for which there is a great interest of the strategic partners.

However, as the method through Public Offering of Shares does not produce the fresh capital flow, necessary for the settlement of the liabilities, which burden the major part of enterprises to improve their financial situation, and does not lead to the restructuring of enterprises as the necessary condition for their future survival, the tender as a privatization method became one of the significant ways for the privatization of the state capital.

Privatization in FBiH is overall process, which on one side gives the possibility to all local and foreign physical and legal entities to participate in the purchase of the state capital. On the other side, privatization includes enterprises, banks and apartments with existing tenancy rights.
